Supply Ontario

Supply Ontario is a new provincial agency with an ambitious mandate to transform and modernize the province's public sector supply chain management system.

Supply Ontario's vision is to build world-class capability that harnesses Ontario's buying power to enable economic development, province-wide resilience and value for Ontarians. We are currently establishing our initial operations, building our foundational infrastructure and planning for how the agency can best provide services. Diversity, Inclusion and Belonging are important values of the organization, where each employee is respected and valued for their differences. Every employee brings unique skills, background and experiences to Supply Ontario, regardless of race, national or ethnic origin, colour, religion, age, sex, sexual orientation, gender identity or ability. These diverse and different perspectives enrich our organization and our working life.

La diversité, l'inclusion et l'appartenance constituent des valeurs importantes de l'organisme, où tous nos employés sont respectés et estimés pour leurs différences. Chaque employé apporte des compétences, des antécédents et des expériences uniques à ApprovisiOntario, sans égard à sa race, à son origine nationale ou ethnique, à sa couleur, à sa religion, à son âge, à son sexe, à son orientation sexuelle, à son identité de genre ou à sa capacité. Ces points de vue diversifiés et différents enrichissent notre organisme et notre vie professionnelle.

DATA ANALYST

Supply Ontario is seeking a Data Analyst to support its goal as the procurement commercial face for government to work across the system to build an integrated, efficient and strategic supply chain that benefits our economy, businesses, customers and Ontarians.

Reporting to the Chief Supply Officer, you will be accountable for providing insights for critical supply chain process improvement and cost savings opportunities through financial reporting, benchmarking, and the development of supply chain related reporting tools.

In this role, your key responsibilities will include:
- Identifying requirements and obtaining and managing relevant data from multiple internal and external sources on supply chain outcomes and measures. Reviewing data for quality, consistency, and appropriateness.
- Leading the development of data standards that define the acquisition, data cleansing, storage, security, retrieval, dissemination, archiving and disposal of data assets in order to provide appropriately robust access to accurate information for decision support.
- Preparing conclusions and making recommendations by analyzing and interpreting data summaries; analyzing and evaluating differences in relationships among sources of information; determining limitations on reliability and usability of data.
- Determining approach to performance analysis (logic modelling and benefits realization mapping) and performance results by aggregating and analyzing performance data for the development of actionable insights to enhance decision support capabilities; suggesting methods for maximizing performance data, drawing conclusions, and reporting on the analysis performed.

Successful candidates will demonstrate the following:
- Degree in Mathematics, Statistics, Computer Science, or related degree and relevant

HRASSOCIATES

experience.

- Demonstrated experience in data analytics, business analysis, systems administration and maintenance in a supply chain environment is an asset.
- Experience sourcing and assimilating data from various sources to provide a comprehensive, multi-perspective analytical approach to business needs is an asset.
- In-depth knowledge of data analysis, data modeling techniques, data science, statistical analysis, data visualization techniques, query and report design and development, and information/data/records management practices and methods.
- Knowledge of programming techniques and languages (e.g., SAS, SQL, etc.) and statistical analysis software programs (e.g., SAS, SPSS, etc.) for data modeling.

Supply Ontario offers a competitive compensation package including benefits and defined benefit pension plan.
